

TurboKT™ Digital Contract Management provides a system of record to manage the entire contract management lifecycle for Government Contracting Organizations. TurboKT™ streamlines and operationalizes contracting from initiation to closeout. A top-level dashboard views and drills down mission-critical metrics and data capabilities to assess unit health and make critical decisions.

Contracting Simplified

 Intelligent Lifecycle Workflow and Approvals from Requirements to Contract Closeout

 Risk Dashboard for Contracting Transparency on Milestone, Cycle-time, Contract State, Audits and Inspection reporting

 Secure Role-based Permissions for Data, Search, and Contracts Documentation

 Business Intelligence for Type of Contracting Policy, Audit, and Document Compliance

 Built-in Training and Relevant Reference to FAR/DFAR and Organizational Policies

 On-line Centralized Collaboration of People, Process, Data, and Content; Ad-Hoc Reporting and Data Importing/Exporting Capabilities

 Intuitive Design to Quickly Acclimate Your Workforce

Implementation for Government Environment

 Compliant with Security Requirements for Government Networks; Supports Work on All Security Levels- Classified and Above

 Fully Configurable System for Government Enterprise with Single or Multi-level Organizations and Locations

 Operates within Existing Authority To Operate (ATO) Environment and Section 508 Compliant

 Cloud, On-premise or Hybrid Environments

 Open APIs for Integration with Enterprise Applications

 Exceptional User-based Document Management and Records Management Ready

 Built on Microsoft Technologies and a Strong Set of AI/ML Capabilities

Digital Contracting Transformation for our DoD Customers

TurboKT™ is a COTS product configured for the Government environment on Vana's SBIR award-winning Digital Framework. Initially deployed in the United States Air Force, *TurboKT™* is a catalyst for change, fueling digital transformation and focusing on transparency, legal compliance, and end-user training and adoption.

Innovation Recognized

Vana was competitively selected and awarded a Small Business Innovation Research (SBIR) Phase III contract which provides Federal Agencies a Sole Source contracting vehicle with immediate access to *TurboKT™*.

- » Sole Source Direct Award Vehicle
- » Accelerated SBIR Contract Process of Four to Six Weeks
- » Receive Small Business Credit

Small Business Administration (SBA) Policy encourages the use of SBIR Phase III technology “to the greatest extent practicable.”

Use Case: US Air Force

Vana digitally transitioned the US Air Force's enterprise contract planning, execution, and reporting for the contracting community. Business Intelligence capabilities auto generate an e-contracts file with the built-in process, policies, tasks, documents, and user guide for the procurement representative. The result is a collaborative and efficient workstream with organizational and user adoption to focus on the mission.
